

# India's coal crisis brews as power demand surges

Record global prices also bite the industry

REUTERS  
Chennai, October 1

**INDIAN UTILITIES ARE** scrambling to secure coal supplies as inventories hit critical lows after a surge in power demand from industries and sluggish imports due to record global prices push power plants to the brink.

Over half of India's 135 coal-fired power plants have fuel stocks of less than three days, government data shows, far short of federal guidelines recommending supplies of at least two weeks.

Prices of power-generation fuels are surging globally as electricity demand rebounds with industrial growth, tightening supplies of coal and liquefied natural gas, read more

India is competing against buyers such as China, the world's largest coal consumer, which is under pressure to ramp up imports amid a severe power crunch.

Rising oil, gas, coal and power prices are feeding inflationary pressures worldwide and slowing the economic recovery from the Covid-19 pandemic.

"The supply crunch is expected to persist, with the non-power sector facing the heat as

imports remain the only option to meet demand but at rising costs," ratings agency S&P's unit Crisil said in a report this week, adding it expected Asian coal prices to continue to increase.

"Coal inventory at (Indian) thermal plants will improve only gradually by next March." Indian power producers locked in long-term agreements with distribution utilities cannot pass on higher input costs unless a clause to pass on such expenses is written into the contract.

Traders and officials at utilities said buying by power plants dependent of imported coal had been muted due to high prices.

India's average weekly coal imports during August through late September — when global coal prices rallied over 40% to all-time highs — dropped by over 30% from the average for the first seven months of the year, according to data compiled by Kpler.

The import total for the most recent week was under 1.5 million tonnes, the smallest in at least two years. Websites of major coal importing state utilities did not show any new tenders seeking new cargoes this month.

Coal prices from major exporters have scaled all-time highs recently, with Australia's Newcastle prices rising roughly 50% and Indonesian export prices up 30% in the last three months.

## DoT cancels 71 LoIs for providing net service as virtual network operators

PRESS TRUST OF INDIA  
New Delhi, October 1

**THE DEPARTMENT OF** Telecom has cancelled letters of intent (LoIs) issued to 71 firms for providing internet service as virtual network operators, as per an official note issued on Friday.

The virtual network operator (VNO) permit allows firms to resell internet services of telecom companies under their own brand.

According to the DoT note, LoIs were issued to the firms based on applications submit-

ted by them but the department has not received any reply from them even after extension of deadlines.

The applicant companies were required to submit the compliance status of LoI within a period of 60 days from the date of its issue, failing which the same was to be cancelled.

"No response to LoI has been received by this office till date. Further, few companies have sent the compliance after expiry of the validity period of the LoI," the department's official note said.

## Duty cut lifts palm oil imports in Sept to record 1.4 mt

REUTERS  
October 1

**INDIA'S PALM OIL** imports in September more than doubled from a year ago to a record 1.4 million tonnes as buyers increased purchases of refined palm oil ahead of key festivals and to take advantage of newly lowered duties, brokers and dealers said.

Higher purchases by India, the world's biggest buyer of vegetable oils, could support palm oil prices that are trading near a record high hit earlier this week.

The country's total vegetable oil imports in September jumped 72% from a year ago to a record 1.8 million tonnes, including more than 400,000 tonnes of refined palm oil, Sandeep Bajoria, chief executive of Sunvin Group, a vegetable oil broker, said.

"Imports jumped because

of government decision to lower import tax and festive season demand," said Bajoria.

India lifted restrictions on imports of refined palm oil and slashed base import taxes on palm oil, soy oil and sunflower oil in recent months as Centre tries to cool near-record price rises.

Edible oil consumption usually jumps in the December quarter with the start of the wedding season as well as festivals like Dhanteras and Diwali.

Top palm oil producer Indonesia supplied a big chunk of India's palm oil imports in September as it was offering refined palm oil at a discount to number two supplier Malaysia, said a Mumbai-based dealer with a global trading firm.

Usually soybean oil expands its share of India's edible oil market from October as

# Global brands entering India to make EVs: Gadkari

FE BUREAU  
Pune, October 1

**NITIN GADKARI, UNION** minister for road transport and highways, on Friday, said the production linked incentive (PLI) scheme for the automobile sector would lead to fresh investments of ₹42,500 crore in the automotive industry and create 7.5 lakh additional jobs. The minister said several global brands are entering India to produce electric vehicles at a mass scale.

There was a massive response in the domestic market for electric scooters from startups with a company recently setting a record of one lakh units booked worth ₹1,100 crore, he said. The minister said electric two-wheeler sales in the country was at 13,335 units during July 2021, which was a massive 229% month-on-month jump and an 836% year-on-year leap in registrations, which was extremely encouraging.

He expected people to slowly move away from diesel and petrol vehicles. Gadkari was speaking at the annual Symposium on International Automotive Technology (SIAT) 2021 being organized virtually by the Automotive Research Associa-

tion of India with SAE India on 'Future Trends for Mobility'.

In the case of lithium-ion batteries, the country can generate 81% of the value in India and there is a need to work alternatives such as aluminium ion, zinc ion sodium-ion batteries. He urged the Automotive Research Association of India to work on battery alternatives and join hands with ISRO, DRDO and IITs that were working on indigenous development of low-cost battery technology. To support the EV ecosystem, the NHAI was developing electric vehicle charging infrastructure along the highway to promote the use of EVs, he said.

Simultaneously the country also needs to work on alternative fuels such as ethanol,

methanol, bio CNG, LNG, S-CNG and green hydrogen fuel, he suggested. The government was planning to introduce flex-fuel vehicles which allow operation of the vehicle on 100% ethanol and petrol. The flex engine-based vehicles were running in the US, Brazil and Canada with 83% of the light vehicles in Brazil running with flex engines, Gadkari said. He wanted India to move on a similar path. Brazil was also using ethanol for aviation and India too should looking at using bioethanol for aviation would be a game-changer, he said.

Gadkari said there was a need to find appropriate and affordable technology for the generation, transportation and storage of green Hydro-

## Covid: Govt slaps reciprocal travel restrictions on vaccinated UK nationals

REUTERS  
New Delhi, October 1

**UK NATIONALS VISITING** India this month will have to undergo mandatory quarantine even if they are fully vaccinated against Covid-19 in retaliation for UK curbs on Indian citizens, a senior government source in New Delhi said on Friday. The new rules, which take effect from Monday, follow the UK decision to require Indians vaccinated with AstraZeneca's Covishield to quarantine.

"India has decided to impose reciprocity on UK nationals arriving in India from the UK," the source said, declining to be identified in line with government policy.

freshly harvest soybean supplies get processed, the dealer said.

"This year, excessive rainfall in September has delayed soybean harvesting. Besides, demand for local soy meal is weak since imported soy meal is available at lower prices," he said.

New Delhi in August allowed imports of 1.2 million tonnes of genetically modified (GM) soy meal for the first time to help the poultry industry after soy meal prices tripled in a year to a record high.

Sunflower oil imports in September surged 154% from a year ago 170,000 tonnes, while soy oil imports fell to 250,000 tonnes from 316,232 tonnes a year ago, dealers said.

The Solvent Extractors' Association of India, a Mumbai-based trade body, is likely to publish import number for September in mid-October.

## Coal min sets up panel to review, benchmark timelines for project execution

**THE COAL MINISTRY** on Friday said it has constituted a panel to review and benchmark the timelines in project execution, including tendering process by examining tenders having a value of more than ₹300 crore of CIL, its subsidiaries and other PSUs.

The committee has been set up with a view to suggest a robust and efficient set of timelines, the coal ministry said in a statement.

"The Ministry of Coal has set up a committee today under the chairmanship of Joint Secretary & Financial Advisor comprising of representatives from NTPC, IOCL, PGCIL and Director (T), ECL as member secretary for review and benchmarking the timelines in project execution including tendering process by examining tenders having value of more than ₹300 crore of CIL (Coal India), its subsidiaries and other PSUs," the statement said. —PTI

## Sugar exports at record 7.1 MT in 2020-21: ISMA

PRESS TRUST OF INDIA  
New Delhi, October 1

**INDIA'S SUGAR EXPORT** rose 20% to an all-time high of 7.1 million tonne in the 2020-21 marketing year ended last month on the back of better demand and financial assistance from the government, industry body ISMA said on Friday.

Sugar exports stood at 5.9 million tonne in the 2019-20 marketing year (October-September). Addressing a sugar conference, Indian Sugar Mills Association (ISMA) Director General Abinash Verma said sugar production is estimated to remain flat at 31 million tonne in the 2021-22 marketing year, starting Friday.

The total availability of sugar is estimated to touch 39.5 million tonne, including an opening stock of 8.5 million tonne of sweetener, he said.

The domestic consumption is estimated at 26.5 million tonne while exports are estimated at 6 million tonne, Verma said, adding that the closing stock would be 7 mil-

lion tonne at the end of this marketing year.

The ISMA DG pointed out that India witnessed cyclical sugar production till 2009-10 but "India has now become structural surplus sugar producer in the last 10 years".

Talking about ethanol, Verma said annual production capacity is expected to reach 14 billion litres by 2025 from 3.5 billion litres of annual capacity in 2018.

He said the target is to divert 6 million tonne of surplus sugar to ethanol by 2025.

On ethanol blending with petrol, Verma said the blending level will reach 8.5% in 2020-21 ethanol marketing year ending November with supply of 3.25 billion litre of oil marketing companies (OMCs).

In the next 2021-22 ethanol marketing year, the blending level is estimated to reach 10% with supply of 4.25 billion litre to OMCs. To overcome the challenge of high costs of cane and sugar, Verma stressed on rationalising the sugarcane pricing policy in India.
